

# RE2 Rafter Center Locator

## Optimized Rooftop Attachment

# RafterEye

1 lag.  1 hole. No doubt.

### Features

Magnet blocks clamped to rafter set up a symmetrical field vertical at rafter center.

RafterEye rooftop reader precisely indicates rafter center for optimal fastener placement.

Reads through up to 9-10" of substrate.

Swiveling magnet blocks allow tight access, optimization of field to substrate thickness.

Magnet blocks clamp to rafters up to 2x12 or 8x8, can be hand-held for oversize.

RE2 comes in a padded plastic case.

Made in Tucson, Arizona, USA.

### Outcomes

Precisely locates exposed or accessible rafters before any holes are drilled.

Reduces installation time.

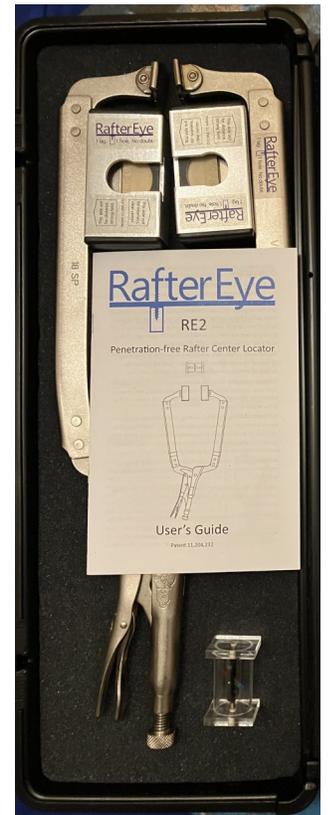

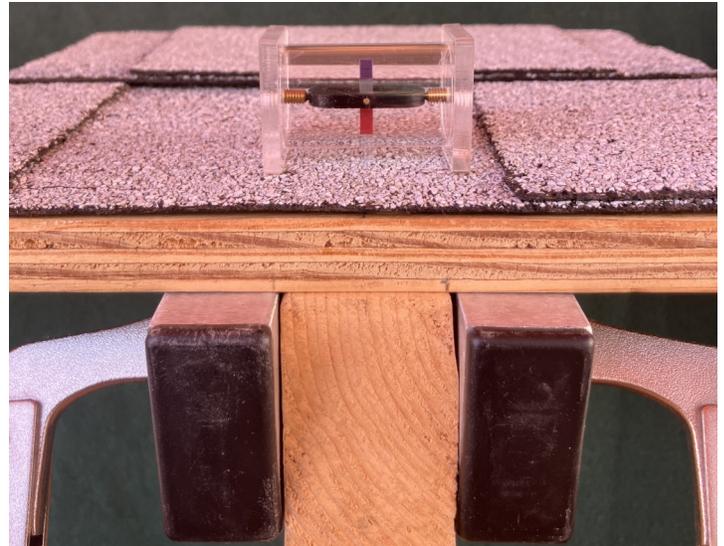

Eliminates error-prone measurement transfer.

Avoids damage, leaks, attachment failure.

Reduces consumables use (drill bits, sealant).

Improves customer satisfaction.

Solar, HVAC, electrical, roofing, remodeling, telecom and other applications.
